New Service Offers Homeowners Reliable Referrals – For Free!

(Rochester, MICH) – Homeowners are turning to Reliable Contractor Connection for all household tasks. Reliable Contractor Connection is a company offering homeowners the opportunity to select from high quality, pre-screened, licensed and insured professional contractors safely and effectively. The company is currently seeking contractors to join the team of reliable Oakland County contractors.

Reliable Contractor Connections can save homeowners money, time and costly mistakes on any household job, such as plumbing, roofing and renovating. All referral services are provided to the homeowner at no cost to the homeowner!

Reliable Contractor Connections is just one of more than 500 home referral networks (or HRNs), one of the fastest-growing types of businesses in the country. However, unlike many web-based referral services, Reliable Contractor Connections offers a personalized approach, says owner Rick Medina, a lifelong resident of Michigan and a volunteer with Habitat for Humanity.

“I want Reliable Contractor Connections to be a safety net and bring trust when connecting contractors and homeowners together. We respond quickly to any request for service submitted to the Web site or by phone and work to set the homeowner up with a reliable contractor as soon as possible,” said Medina.

In order to ensure complete satisfaction, Reliable Contractor Connections makes itself available to clients throughout the job.

A trained realtor, Medina knows the economic downturn has forced many people to stay in their homes, choosing to renovate instead of move. This trend has provided additional opportunities for contractors. Reliable Contractor Connections has developed a diverse network of highly skilled professionals contractors, including plumbers, general contractors, electricians, painters, handymen and more.

Contractors do not pay a fee to join the home referral network, but are required, once given a job, to pay a modest fee. This makes Reliable Contractor Connections a no-risk proposition for contractors, as well as homeowners. The company matches homeowners with contractors based on budget, project scope and detail, schedule and craftsmanship. The homeowners then chose the contractor that is right for them.
